

Advantage
SURGICAL & WOUND CARE

BEDSIDE WOUND CARE SERVICES

Providing extensive bedside surgical wound and skin care related services for residents in post acute care facilities.

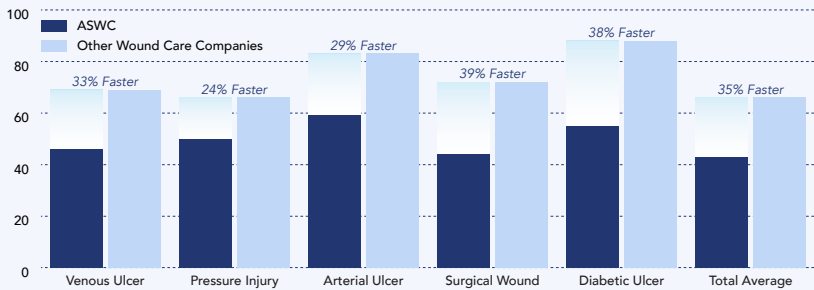

Advantage Surgical & Wound Care (ASWC) understands the complex needs of post acute facilities and their residents. ASWC offers superior professional surgical wound care and related services in the post acute care setting.

Our team provides treatment to residents who have difficulty traveling for wound care. Surgical treatment no longer requires lengthy clinic appointments, expensive emergency transfers or loss of residents to hospitalization. Wound care services are performed bedside, with minimal disturbance to the resident's daily activities or the facility's nursing staff.

IMPROVED HEALING TIMES

Significantly Better Outcomes — ASWC consistently has better results across the board with an average of 35% faster healing times.

Healing Times in Days Over 12 Months (2021–2022)

COMPREHENSIVE

ASWC offers a comprehensive set of services

for all skin deficiencies and more.

- G-tube replacement
- Biopsies
- Laceration repair
- Skin lesion Biopsy and excision
- Surgical debridement
- Skin substitute
- Cryotherapy
- Traumatic laceration repair
- Incision and drainage
- Vascular doppler ultrasound
- Multi layer compression therapy

COLLABORATIVE

ASWC teams work with all facility staff in a collaborative approach to care that includes ancillary providers, nursing staff and primary care physicians. A wide variety of educational programs and resources proactively help the facility and staff. Each facility has a dedicated provider and regional manager that ensures the necessary communication and coordination between staff and provider.

SUPPORTIVE

Our goal is to provide supportive services that help with the care of residents and the unique needs of each facility. Such an approach ultimately improves resident outcomes and eases administrative burdens for facility staff.

- QA participation
- Educational training programs
- Annual survey support
- Plan of correction strategy
- Defensive documentation
