

Greeting everyone,

It's been quite some time since I sent out a newsletter. The original format was a manuscript, dealing with a topic of interest.

As some of you know, when time permits, I teach/discuss wound care management during our rounds. Given the feedback I received for our newsletter and my teaching during our rounds, I have decided to change the format and presentation of our 'new' newsletter.

Our new newsletter will be in an **audiovisual format**, with a brief discussion on a topic of interest. Every two weeks Giselle will send a link to a topic that will be uploaded on the **YouTube channel**. I will try and present educational materials in a basic format so that anyone from CNA's to RN's will be able to understand and further their knowledge of a topic under discussion. Each video will be approximately 10 minutes in length, and the content and format of the presentation will also be useful for various members of the administrative staff.

G.S. Dhillon MD PhD
